ABOUT THE COMPANY

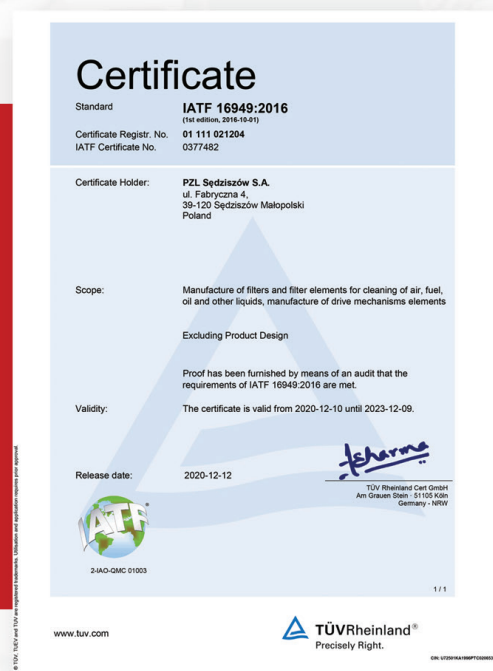

PZL SĘDZISZÓW IS A RENOWNED MANUFACTURER OF FILTRATION SOLUTIONS FOR THE AUTOMOTIVE, INDUSTRY AND AGRICULTURE SECTORS

For over 80 years we have been specializing in the production of all kinds of filters for the automotive, industrial and agricultural industries. The wide range of products includes: oil, fuel, air, cabin, hydraulic and air dryers.

The plant has its own research and development center, where numerous tests and examinations of filters are conducted. The extensive quality control system includes:

- inspection procedures of the purchased materials
- quality control during production processes
- quality control of the finished goods

The effectiveness is confirmed by certificates.

**THE QUALITY
OF OUR PRODUCTS COMPLIES
WITH INTERNATIONAL
STANDARDS AND IS CONFIRMED
BY THE IATF 16949: 2016
STANDARD.**

In addition, we are distinguished by:

- wide assortment
- own component production
- CNC tool shop

The products of PZL Sędziszów are characterized by:

- the highest efficiency of filtration
- very high absorption capacity, often exceeding the required standards
- excellent product quality

The flexibility of production allows us to meet the customer's requirements in terms of construction and functionality.

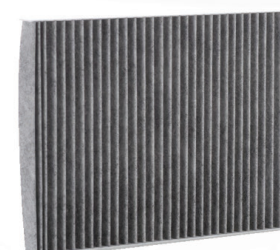

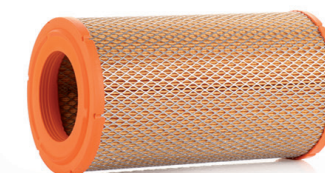

OIL FILTER

The filtration partitions are made of high-quality filter paper, impregnated with special resins. Moreover, they are resistant to high temperatures and aggressive factors contained in the oil. The filtration degree is 10-25 µm.

AIR FILTER

It is made of the newest multilayer filter materials which are impregnated with resins and subjected to thermal treatment. Additionally, they protect the filter against the influence of moisture and oil and fuel vapors. High filtration efficiency, on the order of 99.95%. High absorbency, thanks to the use of a special type of pleating, in the order of 0.3 kg/m².

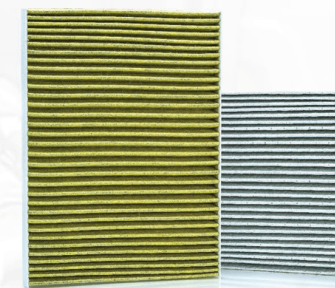

CABIN FILTER

It is made of high-quality polyester-polypropylene non-woven material. It has an excellent ability to absorb pollutants and moisture.

SILVER NANO PROTECT CABIN FILTER

It has an additional, antimicrobial coating of the filter cloth on the side of the cabin, where a bactericidal, liquid colloidal solution has been applied. The result of many years of research is the selection of the right composition and concentration of this substance, which has high antimicrobial activity. The minimum duration of the filter's antibacterial activity is 12 months.

HYDRAULIC FILTER

The filter baffles are made of high-quality filter papers, glass non-woven fabrics and stainless mesh. The accuracy of filtration ranges from 3 to 150 µm, and the working pressure is up to 40 MPa. At the customer's request, the filters are equipped with an indicator of filter contamination.

FUEL FILTER

High efficiency in separating water from fuel and removing contaminants, provide excellent protection of the fuel supply system. The multi-layer filter materials are resistant to the action of fuels. The accuracy of filtration is between 3 and 30 µm. The production includes both box filters and replaceable filter inserts.
